PRESS RELEASE

ProTEQ Solutions LLC., from Nashua, NH., announces that they have signed an exclusive contract to represent **SemiProbe** in Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, and New York.

ProTEQ is an independent test and measurement manufacturer's representative serving New England and now; New York and New Jersey.

SemiProbe is a global supplier of innovative probing and inspection equipment for microelectronics, photovoltaic, optoelectronic, MEMS, biotechnology, chemistry, microfluidics and nanotechnology. SemiProbe specializes in providing modular high quality technology to insure confidence in the test and inspection results and to significantly help reduce overall cost. SemiProbe offers a line of manual, semi automatic and fully automatic systems and a complete line of accessories. The company is based in Winooski, VT.

ProTEQ's General Manager, Charles Freihofer said "SemiProbe's product line is a great compliment to our semiconductor test equipment portfolio. Their probers are especially a good fit with the Agilent products such as the B1500A device analyzer. SemiProbe has designed a unique expandable and modular **probing system called Probe System -For-Life (PS4L)** that allows the customer to buy an affordable prober for today's requirements and to have that investment expand and grow along with their business. Our customers will also like that they are located close by in Vermont and available to meet face-to-face on short notice to better serve the customers."
