FOR IMMEDIATE RELEASE

ProTEQ Solutions Signed as Authorized Stocking Technical Distributor for Tektronix

Nashua, NH - ProTEQ Solutions announces that they have entered into a partnership agreement with Entest to be an authorized stocking Technical Distributor of Tektronix products. Under the agreement, ProTEQ will be trained by Tektronix to technically demonstrate, sell, and support a range of products to include oscilloscopes, logic analyzers and wave form generators throughout all of greater New England.

ProTEQ and Entest will sell the MSO and DPO Mixed Signal Oscilloscopes up to 3.5 GHz.

These products are targeted at design engineers who need to verify, characterize, debug or test their electronic designs and they require a technical sales team to adequately demonstrate their capabilities.

Combining a distributor with a manufacturer's representative company gives ProTEQ and Entest a unique advantage by being able to provide Tektronix customers with the technical team needed to sell and support the products. Customers will place their orders locally with ProTEQ Solutions and Entest will ship the products to the customer from stock. Customers will receive competitive distribution pricing with the added benefit of local technical support. ProTEQ and

Entest will work closely together to make sure that they have inventory available to meet the demands of local customers.

ProTEQ is an independent test and measurement manufacturer's representative serving all of New England. They represent some of the top manufacturer's in the industry including Fluke Corporation, Elgar, Sorensen, California Instruments, Boonton, and Trak Microwave. ProTEQ's General Manager, Charles Freihofer said, "We are very excited about the opportunity to represent Tektronix and to provide local customers with immediate order fulfillment through our partnership with Entest. Under this agreement, our customers can place their orders directly with ProTEQ, allowing them to order the products from the same person who helped them with their technical solution and who will support them after the sale."

Entest, Inc. is a national stocking distributor and of test and measurement equipment located in Carrollton, Texas.
